## About Me

Born in New York in 1988, I spent my formative years in Italy, where I grew up and graduated from the ITCG (Technical School for Construction and Surveying) in a small town in the south of Sicily. I then pursued my passion for architecture by earning a degree from the Faculty of Architecture at the University of Palermo. After successfully completing my PhD in September 2017, I had the privilege of collaborating with an architectural design studio, an experience that inspired me to fulfill my dream of opening my own architecture studio and working on projects around the world (2023).

I am an architect with a strong passion for transforming spaces into works of art. With seven years of dedication to my profession, I have honed my skills to design environments that are not only visually extraordinary but also deeply functional. Every project I take on is an opportunity to combine creativity and practicality, creating spaces that not only captivate the eye but also serve their purpose flawlessly.

I have refined my expertise in architectural design, creating innovative and functional spaces that harmoniously blend aesthetics and practicality, passionate about eco-friendly design, focusing on promoting energy efficiency and sustainability in architectural projects. Using cutting-edge design software, I excel in creating detailed architectural plans and complex 3D models for a wide range of projects.

## Architetto Calogero Soldano

- Viale Varsavia, 49 Ribera (Ag)
